Çift Plaka Plastik Enjeksiyon Makinesi  
*Two Platen Injection Moulding Machine*

Injection Moulding Machine

**FAVORİ**  
**GRUP**

## Çin'de üretilen çift plaka enjeksiyon makinelerindeki sıkıntılı noktalar

*Two Platen Injection  
Moulding Machine Technical  
Pain Points in China*

### Kalıp Açıma/Kapamadaki Yavaşlık *Mold Open & Close Not Smoothly*

Kontrol grubu geliştirmesindeki sınırlı bilgi birikim, üreticilerin çoğunu kalının ve makinenin sallanmasını önlemek için kalıp açma/kapama hızını düşürmeye iter.

*Limitation of controller program development, most of the manufacturers have to slow down the speed of mold open and close to avoid the mold and machine shaking.*

### Kolon Millerinin Kolay Kırılması *Tie Bar Easily to Break*

Kolon mili kırıldığı takdirde kullanılmak üzere, makine ile birlikte yedek parça olarak kolon mili gönderimi normal bir durumdur, bu da; üreticiler ne kadar çaba harcasalar da üst düzey müşterilerin Çin üretimi makineden uzak durmalarına sebep olur

*It's the normal case that one tie bar goes along with the machine as a spare part in case of tie bar break, which cause many high-end customers not willing to use China Made two platen machine even though the manufacturers try hard to improve*

### Kilitlemenin Kararlı Olmaması *Luck Not Unsteady*

Kilitleme somunlarının arızalanması nedeniyle üretim çoğu zaman durur.

*Production and operation is often stopped by lock nut failure*

**Bole çift plaka enjeksiyon makinelerinde bu sorunların hiç birini yaşamazsınız.**  
**Bole two platen injection moulding machine can solve these problems effectively**

# DK Serisi / DK Series

## Çift Plaka Plastik Enjeksiyon Makinesi Two Platen Injection Moulding Machine

Alman dizayını  
ergitme sistemi  
Ergitme verimliliği  
Uzak Doğu'lu makinelere  
orana %20 daha fazladır.

German design  
plasticizing system  
The plasticising efficiency far  
exceeds the domestic level  
by more than 20%

Enjeksiyon basınç sensörü  
Tahmin edeceğiniz gibi üretim  
sürecini ayarlayabilirsiniz

The injection pressure sensor  
As you imagine, customer can  
adjust the produce process

Bağımsız yağfiltresi ve  
soğutma sistemi  
Makinanın hidrolik ünitesindeki  
yağ sıcaklığı sabit kalır.

Independent oil filter and  
cooling system  
The oil temperature in  
the hydraulic circuit of  
the machine is very stable

Besleme boğazı sıcaklık kontrolü  
Enjeksiyon ünitesinin verimliliğini  
ve doğruluğunu artırır.

Stable feeding zone temperature  
To improve the efficiency and accuracy  
of the entire injection unit

Dik yerleştirilmiş  
pompa ve motorlar

Vertical placed  
motors + pumps

# **DK Serisi çift plaka plastik enjeksiyon makinelerinin 11 fark yaratan özelliği**

## ***DK Series two platen injection moulding machine eleven core strengths***

### **01 Kırılmaya karşı dayanıklı kolon mili** *Break-resisting tie bar*

Kolon mili üzerindeki stres çok azdır, kırılma riski neredeyse yoktur. Aşırı yük ve eğilmeye dayanıklıdır.

Less stress for weak point tie bar, there is almost no risk of fracture. High overload and bending resisted tie bar

### **02 Yüksek hassasiyet ve sertlikte lineer kızak** *High precision & rigidity linear rail*

DK serisi çift plakalı makineler hareketli plakayı tutmak için, yüksek hassasiyet ve sertliğe sahip lineer kızak üzerinde kayan ayaklar kullanır. Hareketli plakanın yüksek hassasiyette konumlanması garanti eder. Yağ sıçrama problemi olmadan makinenin performansı daha da iyileşir

DK series two platen machines adopt high precision and high rigidity linear guide coordinates with sliding foot to support movable platen, guaranteeing high positioning precision of movable platen and faster opening and closing speed. Without the problem of splashing lubrication oil, the performance of whole machine gets further improvement

### 03 Yüksek verimli Alman tasarımlı plastikleştirme sistemi *High efficiency German designed plasticising system*

Alman tasarımlı plastikleştirme sistemi Uzak Doğu rakiplerinin %20 üzerinde bir verim sağlar.

*Originated from Germany design Plasticizing System, efficiency excess above 20% of domestic level*

Karmaşık teknik gereksinimlere cevap verebilecek özel tasarımlar  
*Custom made complicated technical requirement, applied to special plasticizing system*

Tüm seriler en iyi plastikleştirme etkisini ve verimi elde etmek için A/B/C vida ve 23:1 L/D oranı ile donatılmıştır.

*All series can fit with A/B/C screw, L/D ratio 23:1, to achieve the best plasticizing effect and efficiency.*

### 04 Dikey konumlandırılmış motor ve pompalar *Vertical placed motors & pumps*

Motor dikey olarak yerleştirilmiştir ve bu sayede kapladığı alan azaltılmıştır. Aynı zamanda rotorda yerçekimi kaynaklı eksantrik yük etkisi azalır ve motor daha kararlı çalışır.

*The motor is placed vertically, reducing the footprint. At the same time, the influence of the eccentric load caused by the gravity of the rotor of the motor is reduced, and the motor is more stable.*

**DK Serisi Çift Plaka Plastik Enjeksiyon Makineleri, Alman Mühendisliği ile geliştirildi, Çin Çift Plaka Enjeksiyon Makine pazarı yeniden şekillendirildi.**

**DK series two-platen injection moulding machine, developed by the German chief engineer, reshapes the Chinese two-platen injection machine market.**

**05 Hızlı, sağlam ve darbe önleyici kilitleme sistemi**  
**Fast, stable and impact-free locking system**

Kolon mili ve kilitleme somununun korunması için, ekipmanın kullanım ömrünü uzatan hızlı, pürüzsüz, sessiz ve daha etkin somun.

*Fast, smooth, quiet, more effective lock nut to protect tie bar and nut itself, prolong equipment lifetime.*

**06 Senkronize itici (maça) hareketi**  
**Synchronized ejection (core) movement**

Eş zamanlı itme (maça çekme) fonksiyonu standarttır, bu sayede makine çevrim verimliliği artar.

*Simultaneous eject (core pulling) functions as standard, improve machine cycle efficiency.*

**07 Özel enjeksiyon pistonu dizaynı**  
**Special injection cylinder design**

Yeni enjeksiyon pistonu oldukça düşük yağ dönüş direncine sahiptir ve enjeksiyon parça sürtünmesini azaltmak ve enjeksiyon ünitesinin kontrol hassasiyetini büyük ölçüde iyileştirmek için lineer kızak şasisi ile birlikte çalışır.

*The new injection cylinder has extremely low oil return resistance and cooperates with the frame structure of the linear guide to reduce the friction of the injection part and greatly improve the control precision of the injection unit.*

## 08 Her dişe eşit yük *Equal stress on each teeth*

Her dişenin eşit yük sayesinde daha uzun kilitleme somunu ömrü

*Equal stress on each teeth, longer life time for locking nuts.*

## 09 Bağımsız yağ sistemi ve soğutma sistemi *Independent oil filter and cooling system*

Kompakt yapısı ile daha az yer işgal eder. Çevrim süresi ve diğer çalışan elemanlar gibi, yağ sıcaklığını herhangi bir kesinti olmadan sabitler.

*Very compact and less space occupation. Stabilize the entire oil temperature without any other interruption, such as cycle time and other working elements.*

**10 Besleme boğazı sıcaklık kontrolü**  
**Stable feeding zone temperature**

Besleme boğazı sıcaklığı, enjeksiyon ünitesinin verimliliğini ve doğruluğunu artıran sıcaklık ünitesinin kapalı devre kontrolüne dahildir. Bu sayede topaklanma ve yanlış ayarlamadan kaynaklanabilecek enjeksiyon verimsizliğinden kaçınılabilir.

*The temperature of the lower feed port is incorporated into the closed-loop control of the temperature unit, which improves the efficiency and accuracy of the entire injection unit. Avoiding the influence of unloading agglomeration and misalignment, the injection molding precision is low.*

**11 Enjeksiyon basınç sensörü**  
**Injection pressure sensor**

Enjeksiyon basınç değeri her zaman kontrol grubuna yansır ve enjeksiyon grafiği ürün prosesini daha rahat ayarlamınızı sağlar.

*The injection pressure is always fed back, and the injection curve allows the customer to adjust the product process more conveniently.*

# Sıkıştırma Ünitesi / Clamping Unit

Clamping Unit						
	520-1200DKW		1300-3000DKW		3000-6800DK	
	Standard	Optional	Standard	Optional	Standard	Optional
T-slot platen (including T-slot + Screw holes)	●		●		●	
Moving platen feet slip adopts linear guide rail support structure	●		●			◎
Anti-down support in slide shoes of movable platen, high hardness steel strip					●	
Hydraulic and electrical dual safety protection device	●		●		●	
Automatic mold height calibration	●		●		●	
Automatic adjustment of clamping force on demand	●		●		●	
Euromap UI8 robot position	●		●		●	
Lowpressure mould protect with high precision	●		●		●	
Equipped with safety screen in the clamping unit	●		●		●	
Auto-door control and safety switch in its bottom and confirmed button in mold closing	●		●		●	
The operation of the open/close mold,ejection is controlled by a high precision electronic ruler	●		●		●	
Optional:multiple ejector model,saperated setting pressure,speed	●		●		●	
Equipped with synchronous ejector and core pulling system	●		●		●	
Pull back the central ejecting rod to reset forcibly	●		●		●	
Two groups of water flow meter (one in stationary platen and one in moving platen, Below 950DK is 4 in/4 out, above 950DK is 6 in/6out)	●		●		●	
Self-detector for volumetric central oil lubrication,eqiped with terminal pressure detection	●		●		●	
Two core puller as standard (one in stationary platen and one in moving platen),reserve one core puller in moving platen	●		●		●	
Differential hydraulic circuit for mold open	●		●		●	
Mold open/close proportional valve	●		●		●	
Emergency stop button on operating side and non-operating side both	●		●		●	
Magnetic Platen Eu70		◎		◎		◎
Hydraulic clammer		◎		◎		◎
Tie bar pull function		◎		◎		◎
Mould heat shiled plate		◎		◎		◎
Bigger mould height		◎		◎		◎
Quick mold change system		◎		◎		◎
Wider machine cover&door		◎		◎		◎
Bigger eject force		◎		◎		◎
Bigger eject stroke		◎		◎		◎
Screw hole platen		◎		◎		◎
Special requirements for water block (including fast plug-in, water glass tube flowmeter)		◎		◎		◎
Special number requirement of core		◎		◎		◎
2 air blow		◎		◎		◎

# Enjeksiyon Ünitesi / Injection Unit

● Standard ◎ Optional

Injection Unit	520-1200DKW		1300-3000DKW		3000-6800DK	
	Standard	Optional	Standard	Optional	Standard	Optional
Injection/charging base use linear guide rail support structure	●		●		●	
German designed efficient plasticizing quality nitride steel screw barrel	●		●		●	
Barrel support	●		●		●	
Multi-section PID temperature control for nozzle and barrel	●		●		●	
Totally enclosed insulation cover, nozzle cover	●		●		●	
Injection stroke control with precise transducer	●		●		●	
The strimming device of the nozzle centering	●		●		●	
Time-setting heating function,screw cold start protection	●		●		●	
Screw anti-fluid device(pull-out/retract/suck back)	●		●		●	
Screw rotation speed detection	●		●		●	
Auto purge function for cleaning the barrel	●		●		●	
Proportional back pressure of charging	●		●		●	
Carriage manual control central lubrication	●		●		●	
Extented nozzle,extent to 50mm	●		●		●	
Ceramic heating band	●		●		●	
(gas/water)assistant injection signal interface	●		●		●	
The material feed opening temperature control	●		●		●	
Bearing type mobile hopper seat with ordinary hopper	●				◎	
Hydraulic synchronous charging system		◎ (≤2300T)		● (≥2700T)		
Feeding plate,without hopper		◎	●			●
Carriage Automatic central lubrication		◎		◎		◎
Special screw barrel (electroplating,alloy,and hard pcmma,pbt,pa,ect)		◎		◎		◎
Extented nozzle,extent to 100mm		◎		◎		◎
Spring or hydraulic,penumatic and shut off nozzle		◎		◎		◎
Enlarging the injection unit		◎		◎		◎
Decrease injection unit		◎		◎		◎
Infrared heating band		◎		◎		◎
Barrel fan coolingsystem		◎		◎		◎
Electrical charging		◎		◎		◎
Signal interface of dosing color machine		◎		◎		◎
Micro-foaming molding		◎		◎		◎
Upgrade plasticizing motor		◎		◎		◎
Nitrogen injection function (Accelerate container)		◎		◎		◎

# Kontrol Ünitesi & Hidrolik Ünitesi

# Control Unit & Hydraulic Unit

Control Unit & Hydraulic Unit						
	520-1200DKW		1300-3000DKW		3000-6800DK	
	Standard	Optional	Standard	Optional	Standard	Optional
KEBA computer (12 inch)	●		●		●	
Multiple operating language	●		●		●	
Tricolor alarm light	●		●		●	
Real-time clamping force monitoring	●		●		●	
Euromap UI2 manipulator interface	●		●		●	
USB interface, easy backup panel application update and mould parameters save	●		●		●	
Have stop memory function, random can store 240 sets mould data	●		●		●	
Abnormal alarm and modified record	●		●		●	
Multi-level password settings to prevent the error revising/changing unintentionally and the user could be freely authorized the qualifier to access the related password level as request	●		●		●	
Input, output point detection and i/o online simulation function, can quickly confirm the machine operation status	●		●		●	
Quality data process monitoring interface	●		●		●	
Production statistical process control real-time list interface (SPC)	●		●		●	
Socket: 5-core 32Ax2 + 5-core 16Ax1, 3-core multi-functionx2	●		●		●	
Injection moulding machine industry 4.0 network monitoring system interface	●		●		●	
Servo energy-saving system	●		●		●	
Oil temperature detection, deviation automatic alarm	●		●		●	
Motor overload protection function	●		●		●	
Independent cooling filtration system	●		●		●	
Computer KEBA (15")		◎		◎		◎
Euro map67 robot interface		◎		◎		◎
Process data protection lock		◎		◎		◎
Hot runner interface		◎		◎		◎
Special requirement socket		◎		◎		◎
Computer network centralized control, network monitoring system		◎		◎		◎
Real-time energy consumption monitoring		◎		◎		◎
The computer has built-in operation instruction to view the function		◎		◎		◎
Multi-group sequential injection function		◎		◎		◎
Upgrade servo pump&motor system		◎		◎		◎

Injection Moulding Machine

Alman kalitesini sağlamak için bağımsız olarak çalışır ve Avrupa performansını mükemmel şekilde sunar.

100'den fazla test, 20'den fazla patent, hız, hassas ve kararlı çalışma. Avrupa ürünlerile karşılaştırıldığında otomobil endüstrisi için ilk tercih olacak.

*Operate independently to ensure German quality and present European performance perfectly.*

*More than 100 tests, more than 20 patents, speedi accuracy, stability abd increased. It will become the first choice in automobile industry compared with European products.*

Otomobil endüstrisi  
Automobile industry

Beyaz eşya endüstrisi  
Household electrical appliance industry

Derinliği yüksek ürünler  
Deep cavity product
